## What We Do

# ProLab82 Industry – Intro/Print Pitch

## ProLab82 Industry

- ProLab82 Industry operates at the intersection of engineering precision, quality management, and operational excellence, serving clients across the automotive and industrial sectors. Our multidisciplinary team brings decades of experience in OEM and Tier 1 environments, supporting organizations in achieving compliance, performance, and sustainable growth.

### Professional Focus Areas:

- APQP: Structured planning and validation of new products and manufacturing processes
- FMEA: Systematic risk analysis to prevent failures early in the development cycle
- MSA: Evaluation of measurement systems to ensure reliable quality data
- SPC: Statistical process control to maintain and verify process capability
- PPAP: Management and approval of supplier and production part submissions
- 8D Method: Sustainable problem-solving for customer complaints and escalation cases

### Social and Leadership Strengths:

- Clear, reliable communication: Multilingual and tailored to diverse stakeholder groups
- Intercultural competence: Proven experience in international teams and global supply chains
- Empathy and conflict resolution
- Team integration: Fast onboarding into existing structures
- Decision-making and motivation
- High self-reflection and professionalism

### Your Added Value

We provide immediate relief, take full ownership, and deliver measurable results.

With strong methodological expertise and leadership capability, we create stability, transparency, and sustainable solutions.

### Core Skill Requirements for Our Managers

- Leadership capability:** Rapid team alignment, motivation, and taking ownership in critical situations
- Change management:** Steering transformation, managing resistance, and driving sustainable change
- Crisis and problem-solving competence:** Fast stabilization, prioritization, and execution under pressure
- Project and process management:** Structured planning, control, and strong results orientation
- Analytical thinking:** Quickly understanding complex situations and translating them into actionable solutions
- Communication strength:** Clear, reliable, audience-appropriate communication
- Stakeholder management:** Confident interaction with executives, customers, suppliers, and internal teams
- Industry and technical expertise:** Relevant know-how for the specific operational environment
- Digital competence:** Proficiency with tools, data, automation, and modern work methods
- Agility and flexibility:** Rapid adaptation to new situations and evolving requirements
- Integrity and neutrality:** Objective decision-making without internal politics
- Resilience and self-management:** High personal responsibility, stress tolerance, and focus

### Determinants of Average Daily Rates

#### Industry sector:

- Automotive, pharmaceuticals, aerospace, medical technology

#### Project characteristics:

- Turnaround situations, escalations, certification challenges; Interim Management.

#### High-criticality scenarios:

- Particularly demanding environments such as audit crises, supplier escalations, automotive special approvals, or FDA-related issues

# ProLab82 Industry – Company Introduction

## Areas of Expertise

### ProLab82 Industry

- ProLab82 Industry operates at the intersection of engineering precision, quality management, and operational excellence, serving clients across the automotive and industrial sectors. Our multidisciplinary team brings decades of experience in OEM and Tier 1 environments, supporting organizations in achieving compliance, performance, and sustainable growth.

### Our Mission

- To deliver measurable, ISO-compliant solutions that reinforce reliability, precision, and customer satisfaction across every stage of industrial and automotive production.

The graphic features the ProLab82 Industry logo at the top left, followed by the text 'AREAS OF EXPERTISE'. Below this, a grid of six images illustrates various expertise areas: 'Audit Preparation & Training' (a person with a checklist), 'Troubleshooting & Operational Risk' (a worker with a warning sign), 'QMS Optimization' (gears and charts), 'OEM & Tier 1 Readiness' (a car on an assembly line), 'Audit Coaching' (a group of people in a meeting), and 'Operational Disruptions' (workers in protective gear). At the bottom, the slogan 'Driving Quality Excellence' is displayed above a row of five icons representing different industrial and automotive processes.

# ProLab82 Industry – Company Introduction

## What We Do

### We can be hired for:

- Audit Preparation – Comprehensive readiness programs ensuring alignment with ISO, IATF, and OEM standards.
- Audit Coaching & Training – Practical workshops and coaching sessions to strengthen internal teams and audit confidence.
- Troubleshooting Situations – Rapid response to operational disruptions and quality deviations with structured root-cause analysis.
- Operational Disruptions with High Operational Risk – On-site intervention and stabilization plans to restore production continuity.
- QMS Optimization – Systematic improvement of Quality Management Systems to enhance efficiency and traceability.
- OEM Business Entry Preparation – Strategic guidance and documentation support for companies aiming to qualify as Tier 1 suppliers in the automotive industry.

# Final Statement

At ProLab82 Industry, we stand for :  
precision, reliability, and measurable results.

Our mission is to empower industrial and automotive organizations to achieve excellence through structured quality systems, operational resilience, and continuous improvement.

We combine technical expertise with strategic insight to deliver solutions that meet the highest international standards from audit readiness and QMS optimization to OEM Tier 1 qualification.

**ProLab82 Industry**

**OUR COMMITMENT TO EXCELLENCE**

- Commitment to Excellence**  
Delivering measurable, high-impact solutions with precision and integrity.
- Integrated Quality Management**  
ISO-aligned methodologies for consistent and compliant results.
- Client-Centric Collaboration**  
Building trusted partnerships for sustainable success.
- Innovation Through Expertise**  
Advancing through multidisciplinary knowledge and innovation.
- Sustainability & Responsibility**  
Respecting people, resources, and the environment.

**OUR CORE VALUES**

- Integrity & Transparency**
- Measurable Impact**
- Excellence in Execution**
- Innovation & Forward Thinking**
- Global Mindset**
- Continuous Improvement**
- Accountability & Ownership**
- Respect for People & Partnerships**

**Professional Engineering & Quality Management Excellence**

Every project we undertake reflects our commitment to Professional Engineering & Quality Management Excellence, ensuring that our partners operate with confidence, compliance, and performance at every level.
